U of M KERNZA PROJECT

COLLABORATIVE EFFORT BETWEEN:

**UNIVERSITY OF MINNESOTA
STEARNS COUNTY SWCD
ST CLOUD STATE UNIVERSITY
MINNESOTA ASSOCIATION OF PROFESSIONAL SOIL SCIENTISTS**

DRONETECH PARTNERS

KERNZA IS A PERENNIAL WHEATGRASS THAT DEVELOPS A ROOT SYSTEM MUCH MORE EXTENSIVE THAN WHEAT. NOT HAVING TO PREPARE THE SOIL EACH YEAR, ALONG WITH THAT ROOT SYSTEM, MEANS THAT KERNZA CAN REDUCE SOIL EROSION CONSIDERABLY. IT ALSO FIXES CARBON AND REDUCES THE LEACHING OF NITROGEN FROM THE SOIL.
